

PATIENT'S NAME _____ SURNAME _____

Definitions of fatal, non-fatal cardiovascular and infection events

FATAL CARDIOVASCULAR EVENTS	date
☐ Amputation	
☐ Aortic aneurysm elective / rupture	
☐ Acute myocardial infarction	
☐ Congestive heart failure	
☐ Cardiac arrhythmia / cardiac arrest (ablations, pacemaker implantation)	
☐ Coronary artery bypass grafting (CABG)	
☐ Peripheral arterial disease (AAA, claudication intermittent, critical limb ischemia)	
☐ Stroke ischemic and / or transient ischemic attack)	
☐ Stroke hemorrhagic	
☐ Stroke (unknown ischemic / hemorrhagic)	
☐ Subarachnoid hemorrhage	
☐ Other	

NON-FATAL CARDIOVASCULAR EVENTS	date
☐ Amputation	
☐ Aortic aneurysm elective / rupture	
☐ Acute myocardial infarction	
☐ Congestive heart failure	
☐ Cardiac arrhythmia / cardiac arrest (ablations, pacemaker implantation)	
☐ Coronary artery bypass grafting (CABG)	
☐ Peripheral arterial disease (AAA, claudication intermittent, critical limb ischemia)	
☐ Stroke ischemic and / or transient ischemic attack	
☐ Stroke hemorrhagic	
☐ Stroke (unknown ischemic / hemorrhagic)	
☐ Subarachnoid hemorrhage	
☐ Acute coronary syndrome / angina pectoris (chest pain on exertion)	
☐ Carotid procedure (endarterectomy and / or stenting)	
☐ Percutaneous transluminal coronary angioplasty, stenting	
☐ Peripheral arterial intervention (revascularization, percutaneous transluminal angioplasty, stenting in arteries of the lower extremities)	
☐ Other	

INFECTIOUS EVENTS	date
☐ Cardiac infection	
☐ Central venous catheter related infection	
☐ Gastro-intestinal infection	
☐ Graft or fistula infection	
☐ Respiratory infection	
☐ Sepsis (not central venous catheter related)	
☐ Skin / musculoskeletal infection	
☐ Urinary infection	
☐ Other
